

EAGLE TEMPO

EAGLE TEMPO

Eagle Tempo coffee machine balances elegant and aspirational design with relentless productivity.

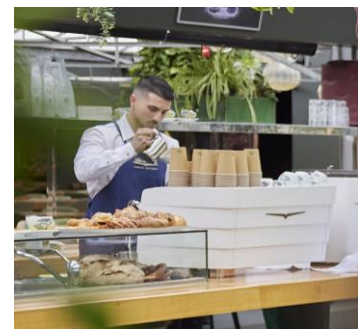

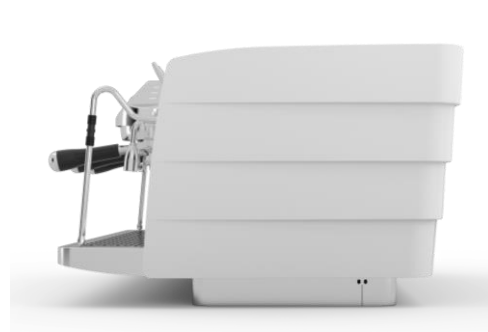

EAGLE TEMPO

Victoria Arduino
INSPIRED BY YOUR PASSION.

TARGET

For restaurants, roasters, chains, bakeries, patisseries and hotels where productivity, consistency, ease of use and quick service are the key factors to respond to their business goals.

EAGLE TEMPO

Victoria Arduino
INSPIRED BY YOUR PASSION.

POETRY IN MOTION

Someone or something that moves in a way that is very graceful or beautiful.

EAGLE TEMPO

Victoria Arduino

A long-exposure photograph of a road at night, showing blurred light trails from vehicles. The trails are primarily orange and red, with some white and blue. The road surface is dark, and the overall scene is dynamic and futuristic.

DESIGN SUSTAINABILITY TECHNOLOGY

Eagle Tempo technology features the Victoria Arduino. Eagle Tempo is more energy efficient than the previous model, which is better for both the business and the environment.

EAGLE TEMPO

NEO TECHNOLOGY

EAGLE TEMPO

NEO (New Engine Optimization) is a system that reduces energy consumption while extracting high quality and consistent beverages.

The NEO is an exclusive and ultimate technology by Victoria Arduino and it's easy to use: barista needs to set the temperature on the display. The electronics of the machine does the rest maintaining the temperature stable during the whole dispensing phase.

NEO TECHNOLOGY

The NEO is a multiboiler technology that uses an instant heating system with a unique insulation mechanism, that reduces not only the heat dispersion but also energy consumption. NEO technology offers high productivity **by using up to 29% less energy than the previous model.**

Productivity and performance remain high, thanks to a bigger boiler ables to prepare many milk/alternative based beverages, but consumption is considerably reduced.

EAGLE TEMPO

STEAM BOILER

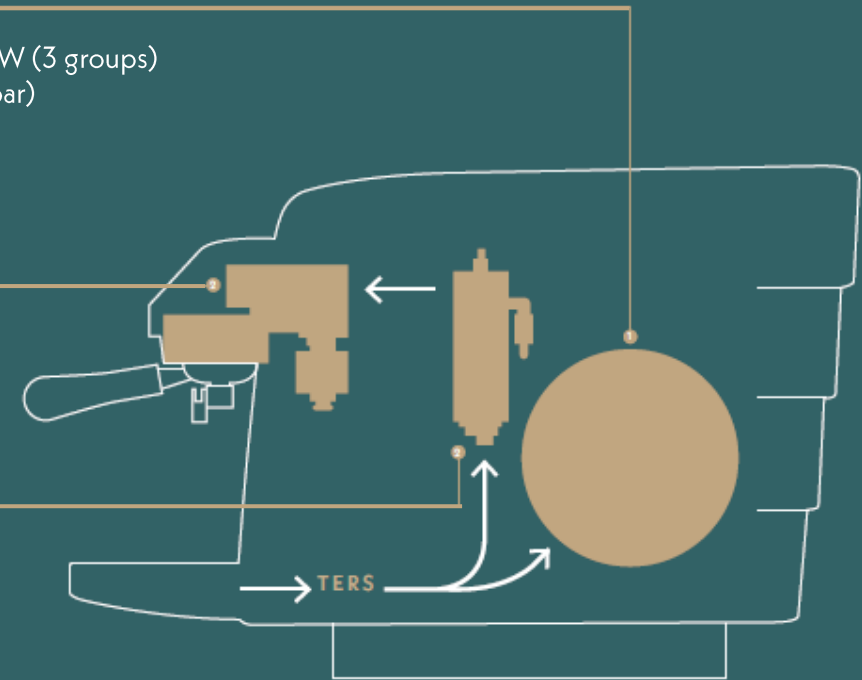

Capacity: 8 lt
Power: 4000 W (2 groups) 4500W (3 groups)
Range: 0.8-2.5 bar (optimum 2.1 bar)
Material: stainless steel

DISPENSING GROUP

Weight: 3.5 kg
Power: 300 W
Range: 80-105°C
Material: brass
Regulation: temperature probe

COFFEE BOILER

Capacity: 0.14 lt
Power: 600 W
Range: 80-105°C
Material: stainless steel
Regulation: temperature probe

T.E.R.S – ENERGY RECOVERING SYSTEM

T.E.R.S. (Thermal Energy Recovery System) uses the discharged water to pre-heat the incoming water. The result is a **8% saving on total machine consumption.**

STEAM BOILER

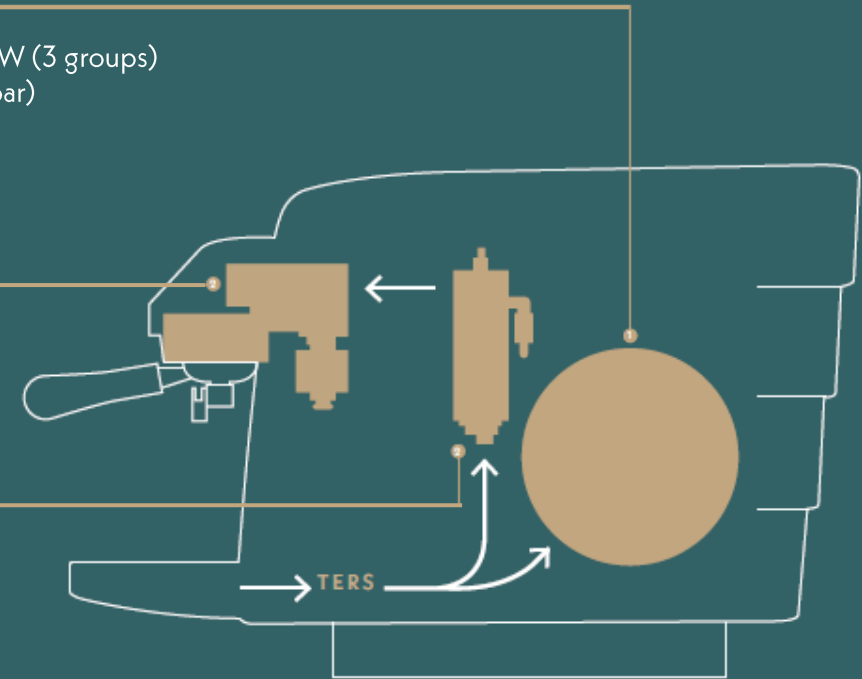

Capacity: 8 lt
Power: 4000 W (2 groups) 4500W (3 groups)

EAGLE TEMPO

REDUCED GROUP WEIGHT

We optimized the shape of the group and its weight by 23% in order to have a

- Faster heating
- Great consistency
- Quick service

STEAM-BY-WIRE TECHNOLOGY

In the Eagle Tempo, the boilers are made of stainless steel high volume and they can maintain a high pressure (2.1 bar) and thus release high quality dry steam.

Also, the Steam by Wire electronic system guarantees the same quality in terms of delivery of dry steam, adding two controls to purge and to steam.

Along with the innovative steam wand featuring the tangential perforated nozzle, Steam by Wire generates a perfect vortex of milk in the steam pitcher that optimizes the micronization of the milk or plant based drinks and guarantees a dense, soft and silky cream.

TOUCHSCREEN DISPLAY

A totally new software and display to have the control of all the brewing information.

Through the touchscreen main display the barista can easily read the **brewing information**, **create new recipes**, **change settings** and **navigate all Eagle Tempo functions**.

EAGLE TEMPO

STAINLESS STEEL DRIPTRAY

EAGLE TEMPO

We've designed a brand-new Stainless steel Drip tray that's easier to clean with a dedicated slot for purge and a frontal panel with a reverse mirror that allows the barista to check the quality of extraction, but without having to squat down!

OPTIONAL FEATURES

EAGLE TEMPO

Victoria Arduino
INSPIRED BY YOUR PASSION.

COOLTOUCH STEAM WAND

The stainless-steel steam wand is always cool to the touch, its 360° rotation and gooseneck shape make it ideal for big-capacity jugs.

EAGLE TEMPO

Victoria Arduino
INSPIRED BY YOUR PASSION.

EASYCREAM

Easycream technology is an **automated steamwand** which takes over for the busy barista, giving your customers any **consistent and high quality beverage**.

Adding the Easycream technology you can obtain a **great consistency of the result during all the working day and a quicker drink production**. The increased pressure, together with Easycream technology allows operators to heat the same quantity of milk or plant based drinks in an automatic way. Operators need to pull down the lever and the Easycream will do the rest preparing your drink at the right temperature and with the correct amount of cream in less time and with high quality.

In this way with Eagle Tempo you can **improve performance and speed up customer service**.

EAGLE TEMPO

AUTOPURGE

Having to stop and clean the portafilter slows things down, it takes up valuable moments when you could be doing something else. Victoria Arduino's Autopurge technology helps to speed up the workflow and saves on water waste. This time-saving feature will automatically clean the portafilters when you're not using them, so they're always fresh for the next basket.

That's one less thing to worry about and more time to focus on your customers, all in one fell swoop.

LOW OR RAISED GROUPS

EAGLE TEMPO

These days, the traditional 8oz Cappuccino is served alongside 12 or 16oz paper cups for customers on the move. For this reason, the Eagle Tempo's drip tray height is available in two sizes, one standard for the 8oz cups and one to accommodate the larger cups. The Eagle Tempo also comes with a bigger working area, a larger drain and removable stainless-steel panels, making it a cinch to keep your workstation clean, practical and efficient.

HEADLIGHTS

Each of the two or three group heads come with customisable, ergonomic headlights. In addition to lighting up the working area so you can see what you're doing, being able to identify the function of a button at a glance is going to be enormously appreciated when you've got a rush of customers.

And it'd be remiss if we didn't complement the aesthetic concept with some beautiful iridescence to light up your life. You're welcome.

EAGLE TEMPO

CUPWARMER

EAGLE TEMPO

Made in stainless steel, Eagle Tempo's adhesive silicone cup warmer resistance ensures that the temperature, set by the Barista on the display, remains perfectly consistent. Simple as that.

Dimensions:

3 groups version - 984 mm x 371 mm

2 groups version - 754 mm x 371 mm

A blurred background image of a clothing store. The scene is filled with various garments hanging on racks, including a prominent brown jacket on the left and a bright pink top on the right. The overall atmosphere is one of a busy retail environment. The text "CHOOSE YOUR STYLE" is overlaid in the center in a clean, white, sans-serif font.
